Amendments to the Claims:

Listing of Claims

1. (Currently Amended) A method of making ready for presentation a graphical element in a computer application program by communicating with a computer operating system, the method comprising:

executing a first procedure for measuring the element, wherein the first procedure at least determines whether the element has one or more children and determines a size for the element based on an element type for the element when the element has no children;

executing a second procedure for arranging the element; and wherein the second procedure is invoked and executed independently from the first procedure.

- 2. (Original) The method of claim 1, wherein the first procedure returns a desired size for the element.
- 3. (Original) The method of claim 2, wherein the first procedure computes desired sizes for child-elements of the element.
- 4. (Original) The method of claim 2, wherein the first procedure comprises determining whether a child-element requires computation of its desired size.
- 5. (Original) The method of claim 1, wherein the second procedure computes a final size for the element.
- 6. (Original) The method of claim 5, wherein the second procedure further computes display positions for a child-element of the element.
- 7. (Original) The method of claim 1, further comprising signaling the element's need to be measured by the first procedure.
